Terms & Policies

Applies to all HIVEN websites.

---

1. Terms of Use

Effective 2026-10-27 · Applies to websites operated by HIVEN (hiven.co.kr · hicoffer.ai · hisilver.ai · hiven.ai.kr) and AI agents distributed as beta (test) versions

1. Nature of the service

All AI agents currently offered are beta (test) versions.
Beta versions are free, and features and schedules may change based on test results.

2. Sign-up

In beta (test release) versions all features are free to use; the digital vault feature requires sign-up.
Only the basic organizing function of Hi DAM (classification system) is free; applying the classification system and additional functions are a paid service (subscription).
Paid services are subscriptions and require sign-up (account linking).
In Hi Coffer, the subscription covers the digital vault (KEYCOVER), which is free during the beta.
All Hi Silver services are subscriptions.
Subscription fees and payment terms for commercial versions will be announced before release.

3. User responsibility

Results of actions the user chooses (moving, deleting or storing files) belong to the user.
The app provides Recovery (Undo) to the pre-action state and an action log.
Recovery (Undo) provided free of charge (including beta) is limited in number, and the company is not responsible for its results.
※ Recovery we take responsibility for (Full Restore) applies only to the subscription service.

4. Intellectual property

Text, design and names (HIVEN, Hi Coffer, Hi Silver, Hi DAM, etc.) of the sites and apps belong to HIVEN.
The user's files and data belong to the user.

5. Disclaimer

Beta versions are provided for testing; please back up important data separately before use.

---

2. Privacy Policy

Effective 2026-10-24 · Applies to: Hi Coffer AI Agent, distributed and downloaded as a beta (test) version

In accordance with the Personal Information Protection Act, the operator of the Hi Coffer AI Agent beta protects users' personal information and sets out this Privacy Policy so that related complaints can be handled promptly.

1. Controller

The current controller is the representative (founder of HIVEN, in incorporation).
After HIVEN is incorporated, control transfers to HIVEN with prior notice on this page and in the app.

2. Processing in the app

There is no sign-up.
All processing (file organizing, vault) happens only on the user's PC and nothing is sent to the internet automatically.

3. Purpose and items (error/feedback reports, optional consent)

Purpose	Items	Basis
Fixing errors and improving the beta and HIVE-Group AI agents	App version, OS version, error code, step, comments written by the user, reply email (if provided)	The user's optional consent (all features work without it)

Reports are collected only when the user previews the content and presses 'Send'.
Vault contents, file names/paths, passwords and recovery QR are never included.

3-1. What is and is not collected

Collected	Not collected
only what the user sends, with consent	not even lists
Support usage cases (which feature the user needed help with), inconvenience and complaint cases, error cases (app version, OS, step, error code), and comments the user wrote	The user's original data such as files, documents and photos and their contents; file and folder names and lists; paths; lists of storage media; data inside the vault and its lists; passwords and recovery QR; conversations with Claude

Reports are received only if, on the screen before sending, the user has confirmed that only the 'collected' items above are included and has consented (checked the box); the time of consent and the items are also kept in the app log on the user's PC.
HIVEN takes only the items approved in this way and uses them only for improvement.

4. Collection channel

A web form managed by HIVEN; until it opens, email (assist@hiven.ai.kr).
If an external service is used for the web form, the processor and the entrusted tasks will be added to this policy and disclosed.

5. Retention and destruction

Kept during the beta and destroyed without delay (within 5 days) after the beta ends; electronic files are deleted irrecoverably.
If the retention period needs to be extended, for example on the move to the official (commercial) version, it will be set again under the privacy policy of that version, users will be notified in advance, and any necessary consent will be obtained again.

6. Third parties

Not provided to third parties.

7. User rights

Users may withdraw consent or request access, correction, deletion or suspension at any time via assist@hiven.ai.kr; consent can also be withdrawn in the app.

8. Security measures

Access is limited to the operator, storage media are encrypted and processing is logged.

9. Privacy officer

Representative · assist@hiven.ai.kr

10. Help and support (internet connection required)

The paid service (subscription) of the Hi Coffer AI Agent app is linked to a cloud service after sign-up.
For help with use or to suggest improvements, you must use the channels below from a PC or phone connected to the internet (wired or wireless).
These channels are provided to support beta users (for the beta period only).
※ In beta (test release) versions, full restoration of data is not guaranteed for the digital vault or data recovery, depending on each user's environment.

When	Channel	How
When you have questions or get stuck during installation or use	Claude AI assistant (Anthropic)	Install the Claude app for free from claude.ai/download, paste the app's 'help request information' and ask (help that operates the PC directly requires a paid Claude plan)
When you want to report errors or suggest improvements	HIVEN web form (email until it opens)	In the app's 'Request help / send feedback', check the report and submit (optional consent)
When the above does not solve the problem	Email	assist@hiven.ai.kr

HIVEN does not collect your conversations with Claude.
Do not upload passwords, recovery QR codes or identity documents anywhere.

11. Changes to this policy

If this policy changes, it will be announced on this page 7 days before it takes effect.

---

3. Usage Policy

Prohibited use

- Accessing others' devices, accounts or data without authorization
- Tampering with, reverse-engineering and redistributing the app, or disguising it as another service
- Storing or distributing illegal content or infringing others' rights
- Disrupting the normal operation of the sites and services

If such use is found, support and distribution may be stopped.

---

4. AI Principles

- AI only guides; the user decides.
- AI-generated answers are labeled.
- It does not make medical, legal or financial judgments and directs users to professionals.
- Original user data is processed only on the device and is not used for AI training.

---

5. Cookies & Tracking

HIVEN websites do not use analytics or advertising cookies or tracking tools.
Cloudflare may set technical cookies for site security.

---

6. Security & Vulnerability Reports

Please report security vulnerabilities to assist@hiven.ai.kr.
We will review, fix and reply with the result.
Do not access other users' data or disrupt the service while reporting.

---

7. Eligibility & Regions

Beta (test release) versions are offered only in the Republic of Korea,
and from the commercial version for Windows PC the service is offered through websites in five languages.
Commercial versions are planned for users aged 19 and over.

8. Contact & Changes

Contact: assist@hiven.ai.kr

Changes are announced on this page 7 days before they take effect.

The Korean version prevails in case of discrepancy.

Note: Each policy is based on beta operation; after HIVEN is incorporated, the controller will transfer to HIVEN.
